

ENROLLMENT tips to MEDICAL BIOTECHNOLOGY Federico II University of Naples

All **non-EU citizens living abroad** wishing to enroll to the Medical Biotechnology course must apply through the [University platform \(https://www.universitaly.it/index.php/\)](https://www.universitaly.it/index.php/), allowing to simultaneously request for a visa for study purposes and University enrollment.

The University portal will allow a pre-enrollment to the degree course. It also provides crucial information on tuition fees and scholarships.

The pre-enrollment procedure is mainly divided in two steps:

- the registration on the platform to create a personal account;
- the application for admission to a degree course at the University of Napoli "Federico II".

The University will evaluate all the correctly submitted applications and the eligible applicants will be "provisionally admitted" upon their arrival in Italy. Once in Napoli, the students will be required to meet in person with UNINA representatives to show authentic school and/or academic qualifications.

The deadline to apply for the pre-evaluation on University website is the **31st of August**.

Please, carefully follow the instruction to avoid errors during the application process. Once you close your application, we will directly receive your request from the master degree secretariat.

To speed up the process, students could also send info at the email biotecnologiemediche@unina.it. A dedicated commission will check the eligibility.
